

SIGNAL FOR ICE ON THE ROAD

SIGNAL FOR ICE ON THE ROAD

Termometro e sonda

SIBESTAR S.r.l.

TempoFlash is a safety device which advise the road users about the ice condition of the road surface.

When the outer temperature goes below 3°C the LED flashing double system starts to flash.

The temperature can also be displayed. Available version with an high precision temperature probe to insert directly into the ground.

The system send an SMS at a set temperature and can be used in "remote control mode" at any time to obtain information (temperature, system status etc.).
